## Naming Things

- Edit the Head/Foot shared layer to set the title document title at the top of the page.
- Rename the canvases to set the page titles

## Using Layer Master

- The Layer Master is non-printing canvas that simply holds the shared layers used by all of the canvas types in the document. This ensures that you don't lose any of your shared layers should you delete it from a canvas.
- Drag shared layers over your working canvas to use as a page master (e.g. wireframe or storyboard)

## Presentation

- This document was created with dimensions of 22" by 34" so that you may work at 100% and project your schematics at 100% in landscape mode.

## Exporting and Printing

- Select menu: File > Export
- From the export dialog:  
Select Format: PDF Vector Image  
Select Export Area: Entire Document
- Print the PDF, being sure that your Printer Handling options are set to "Scale to fit paper size."
